

The FROG

1/10th SCALE R/C OFF ROAD
HIGH PERFORMANCE RACER

[Click here for video clip](#)

Return of the Frog!

First introduced in 1983, the 2WD racing buggy Frog made a huge splash with its eye-catching design and high performance running. The Frog now makes a comeback, updated for a new age, but with its basic structure essentially unchanged. Preserving its characteristic space frame, the oil dampers for trailing-arm type rear suspension have been updated to diaphragm type. Rear drive shaft features dogbone type joint for secure power transmission. Sleek polycarbonate body remains the same, while 3-piece wheels feature front grooved and rear spike tires for excellent off-road running.

2WD Chassis Packed with Innovation Electric R/C racing buggy features. ABS space frame and nylon suspension and bumper for a lightweight yet rugged form that is perfect for off road running. Battery is held in ultra-low position, giving this car the stability and weight balance to handle rough terrain and wild jumps. Advanced 4-wheel independent suspension composed of front double wishbone type featuring in-board spring and durable steel radius arm. Rear trailing arm type features horizontally mounted aluminum cylinder oil dampers for effective shock absorption. Sealed differential gearbox ensures high speed cornering.

Features:

- 540 Motor
- Electronic speed control (ESC)
- Oil filled dampers
- Polycarbonate body
- Includes re-designed side aluminum dampers inspired by TRF shock design
- Includes re-designed dog-bone style drive train with original rubber boots
- Includes straight ribbed racing front tires and high-grip rear spiked tyres
- Wheels are realistic 3-piece type
- Includes diff gear
