

Tamiya Rising Fighter Buggy

[Click here for video clip](#)

The all terrain 2WD Rising Fighter inherits all its great qualities and excellent performance from its predecessors The Hornet (Item 58336) and The Grasshopper (Item 58346) and also uses a similar body to that of other fighter series R/C cars.

- Length: 418mm, Width: 236mm, Height: 187mm, Wheel base: 268mm, Weight: 1000g.
- Independent swing axles for the front suspension, a rolling rigid rear suspension,

and large sized friction dampers effectively absorb shocks and bumps.

- Bevel type diff gear.
- Semi monocoque structure acts as the chassis strengthening part (Screws are used to secure the resin body to the bathtub chassis).
- Fully enclosed gearbox preventing dirt and debris from interfering with operation.
- Powered by a 540 motor (included).
- Grooved front tires and rear spike tires ensure excellent traction for any surface.
- Stylish resin molded body.
- ESC included.
- Running 7.2V battery & charger and 2-channel R/C system separately required.

ELECTRIC KITS REQUIRE:

(unless stated differently above)
